

# colombia asoprocafees decaf

chocolate | goji berry | vanilla | silky

this is a fair trade certified™, organic sugar cane decaf coffee from the tolima region of colombia. it is produced by the 58 members of asociación de productores de café especial orquídea. this is a relatively small and new cooperative founded just five years ago by ten of the current members who were dissatisfied with their access to market, and the low prices they were receiving for their coffee.

this coffee is decaffeinated using fermented sugar cane in country. the benefits of the process, in addition to exceptional flavor, allow the coffee to skip a separate shipping operation to a decaffeination plant, saving both time and energy. this decreases costs along the entire supply chain, and gets the coffee to the consumer faster.

this coffee is grown between 1700 and 2200 meters. it is fully washed with parabolic drying, and consists of caturra, castillo, and tabi varieties.
