

ethiopia neja fadil

espresso profile

white florals | strawberry | meyer lemon | jasmine

this is our first year bringing in coffee from mr. neja fadil, who owns and operates a wet mill in tobitu tuta kebele, a small village located in the uraga woreda of the guji zone in oromia. neja has registered about 250 farmers from the villages around the area, and they now collectively produce about two containers of coffee a year. this particular lot is from 45 of those farmers. though young, neja has been working in coffee for several years, and built his washing station in 2017.

one interesting thing to note is that most of the contributing farmers to this lot just began farming coffee a few years ago, despite the famous nature of the guji region. we expect that neja's already amazing coffee will continue to get better over the next few years as he focuses on agronomy support for his farmers.

this exceptionally high-grown coffee is cultivated at 2150 meters, and consists of heirloom varieties. the bean size is uniformly small and dense, and undergoes 36-48 hours of dry fermentation and 9-10 days of drying on raised beds.

coffee is still an opportunity

at one line coffee, we specialize in sourcing and roasting seasonal, single farm coffees in an ethical and sustainable way. we believe in giving credit to a farmer, and work hard to match their passion when we roast. visit us at onelinecoffee.com
