

colombia la primavera

peach | tropical fruit | white florals | bergamot

arnulfo leguizamo is a legend among his peers, a coffee farmer that others aspire to be. growing incredible coffee on two farms (el faldon and a primavera), he's won many accolades, including 1st place in the colombia cup of excellence competition. but if you met him, you'd never know...

arnulfo continues to be as hard-working and generous as ever, providing a mentor to his son diego, who has taken over management of el faldon. both focus on producing exceptionally high quality coffees, and have even opened up a local cafe, giving them valuable feedback from the ultimate source, the consumer. arnulfo and diego grow several different varieties on both farms, including one of our favorites: sidra. this exceptionally floral and sweet variety is complex and delicious, and one we continuously seek out.

this particular coffee is grown at 1840 meters, and is fully washed, with patio drying. it consists of 100% sidra variety.

coffee is setting the example

at one line coffee, we specialize in sourcing and roasting seasonal, single farm coffees in an ethical and sustainable way. we believe in giving credit to a farmer, and work hard to match their passion when we roast. visit us at onelinecoffee.com
