

guatemala las moritas

orange gummy | tarragon | peach | maple

a wonderfully dynamic, single estate coffee from las moritas in the el progreso department of guatemala. las moritas was purchased by don higinio and his wife doña aura in 1988. starting with less than a single hectare, las moritas has grown to 70 total acres, 56 of which grow coffee. the parcels that make up las moritas are cerro de oro, el potrero, la camioneta, la posa, real café los planes, and moritas vista real. las moritas also grows corn, beans, tomatoes, and peaches that are sold on the domestic market.

the soil is different in each parcel, influenced by the crop that was cultivated there before. las moritas delivered around 4,860,000 pounds of coffee cherry to beneficio la esperanza in last year's harvest.

we first purchased coffee from don higinio in 2017, and this is the third lot we've brought in. we honestly think it's the best! this particular lot is grown between 1700-1800 m.a.s.l. and consists of 100% red pacamara variety. It is fully washed and dried on patio at beneficio la esperanza in antigua, guatemala.

coffee is a farmer's canvas

at one line coffee, we specialize in sourcing and roasting seasonal, single farm coffees in an ethical and sustainable way. we believe in giving credit to a farmer, and work hard to match their passion when we roast. visit us at onelinecoffee.com
